```java
import java.util.Scanner;

public class Sum {
    public static void main(String[] args) {
        Scanner scanner = new Scanner(System.in);

        // Input two numbers
        System.out.print("Enter first number: ");
        int num1 = scanner.nextInt();
        System.out.print("Enter second number: ");
        int num2 = scanner.nextInt();

        // Calculate and display the sum
        System.out.println("Sum: " + (num1 + num2));

        scanner.close();
    }
}
```
Output
Enter first number: 5
Enter second number: 10
Sum: 15
